DYNAMICA

OUR SOLUTION

for technically
challenging
applications

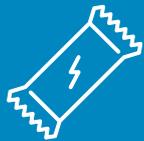

PROTEIN BARS

BEVERAGES

SOLUGEL® Dynamica is your ideal solution for technically challenging applications such as functional bars and beverages. With **SOLUGEL® Dynamica**, you can balance the nutrition, flavor, performance, and texture of your premium collagen end products whilst delivering a wide range of health benefits to your consumers.

SOLUGEL® Dynamica - a “must-have” for your delicious protein bars

Protein bars are one of the most popular collagen product formats on the market.

Thanks to its neutral odor and flavor, **SOLUGEL® Dynamica** can be easily incorporated into your protein bar formulations to achieve a high protein content without impacting the taste and smell of your end products.

At the same time, **SOLUGEL® Dynamica** helps to retain moisture in complex powder mixture environments to give your protein bars a soft, pleasant texture and excellent mouthfeel. It allows you to maintain this softness during the shelf life of the bars and reduce the undesirable chewiness.

SOLUGEL® Dynamica in protein bars
protein enrichment, excellent mouthfeel,
reduction of chewiness, softer texture

collagen peptides

DYNAMICA

SOLUGEL® Dynamica - ideal for your healthy collagen beverages

Collagen peptides are becoming increasingly popular in sports beverages and gels, lifestyle drinks, and liquid clinical nutrition formulations.

Formulating concentrated collagen or protein beverages can be challenging as it requires balancing of the desired high collagen content, taste profile, and mouthfeel.

SOLUGEL® Dynamica has it all - with its excellent properties and dissolution, it can help you overcome all these challenges to optimize your collagen beverage production process and develop stable products. What's more, clear solutions can be obtained in a wide range of concentrations and pHs, even after common heat treatments that are applied in the beverage industry, such as pasteurization. SOLUGEL® Dynamica is stable at both acidic and neutral pHs.

SOLUGEL® Dynamica in beverages

heat stable, clear solution,
wide range of pHs and concentrations,
neutral taste and smell
