

PSR

Protein Solution binder

**Our solution to
elevate pet food
quality and texture**

Protein Solution binderR

PSR helps formulators to enhance protein content and optimize formulations. As a **versatile binder**, it ensures consistent texture across recipes. PSR preserves **juiciness, elasticity, and tenderness** in wet pet food and treats. It especially assists with **effective binding** in extruded formulations, in particular when reducing starch or alternative ingredients.

Whether you are aiming for superior texture, enhanced functionality, or healthier kibbles, we're committed to refining your formulations for optimal outcomes while simultaneously prioritizing profitability.

PSR is derived from pigskin and has been approved as food grade ingredient by the FASFC (Federal Agency for the Safety of the Food Chain) hence ensuring reliability and safety.

Various functionalities

- Water and fat-binding
- Emulsification properties
- Retort stability
- Reduced fat-capping
- High protein content
- High pepsin digestibility
- Low ash content

Wet pet food

Treats

Bring innovation and excellence to your pet food

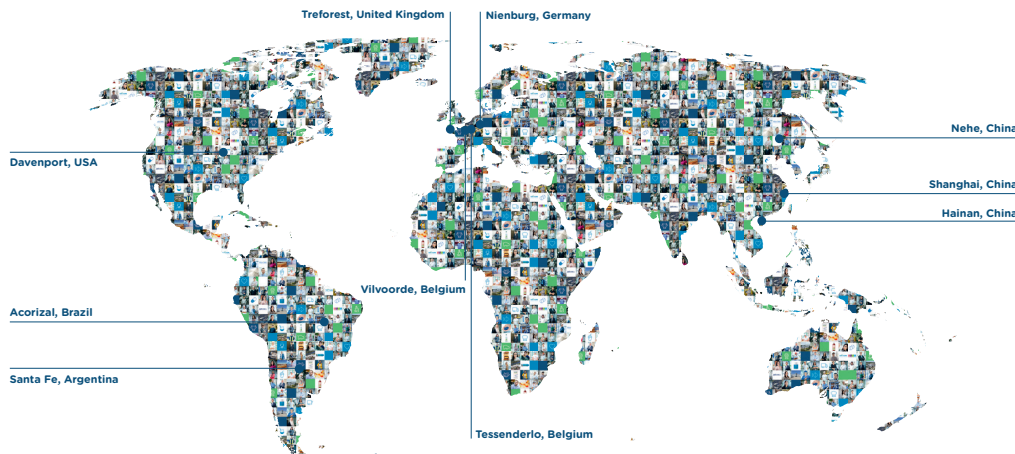

Cost effective: partial replacer of plasma, refined egg protein, vital wheat gluten and other functional proteins.

Replaces up to 30% of functional proteins depending on the formula.

Here for you, around the world - Global gelatin and collagen solutions manufacturer
